

## Problem

Need for an interactive, game-based learning experience where users can host and participate in quiz sessions remotely.

## Solution

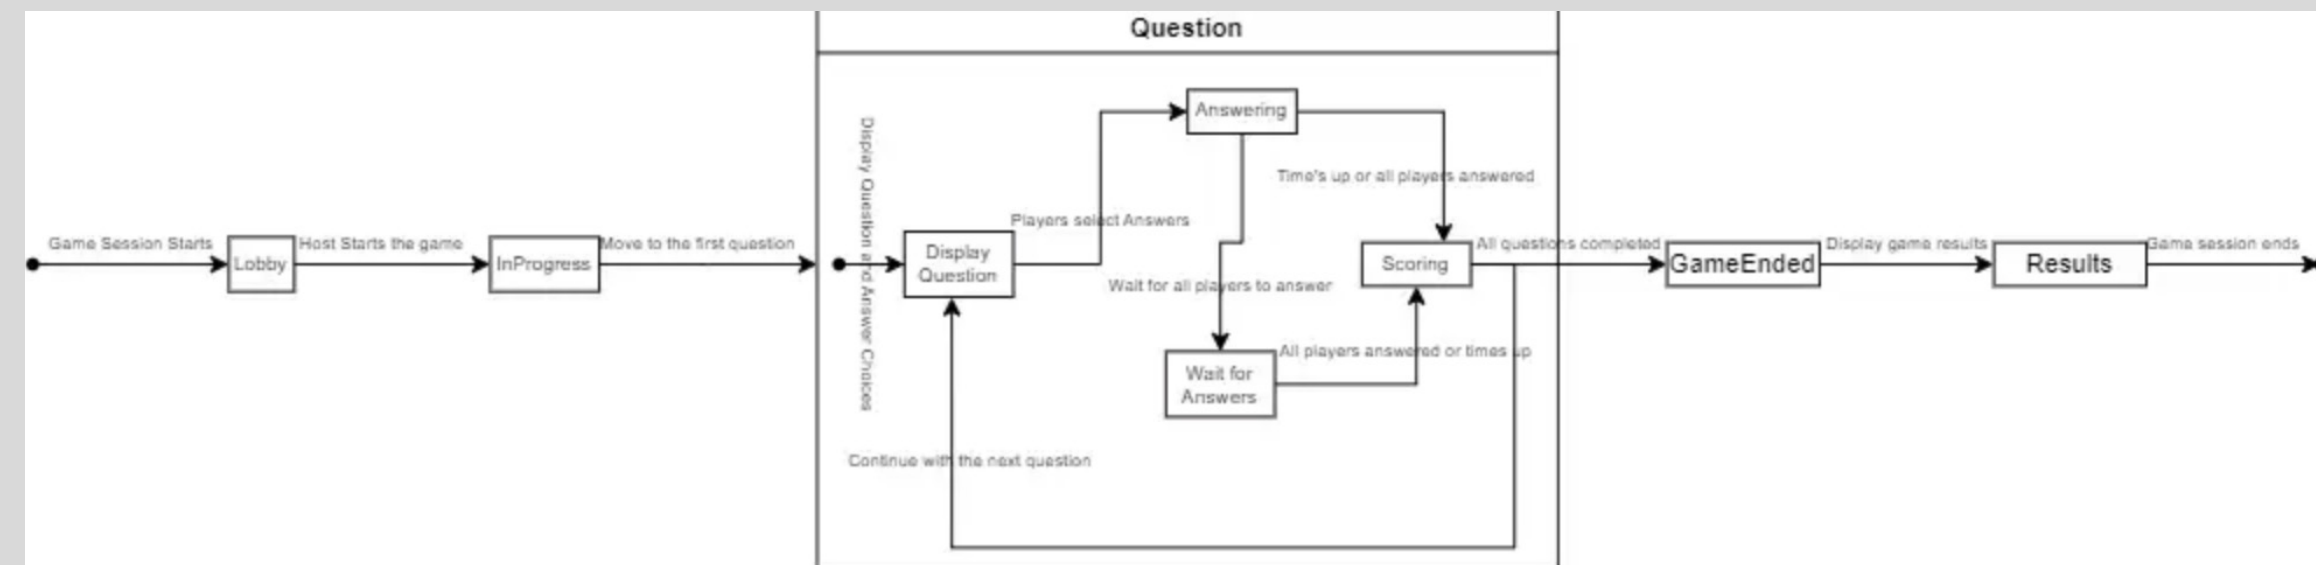

User-hosted web app to create and run quiz sessions, which participants can join with unique quiz ID, inspired by platforms like 'Kahoot!'.

## Technologies

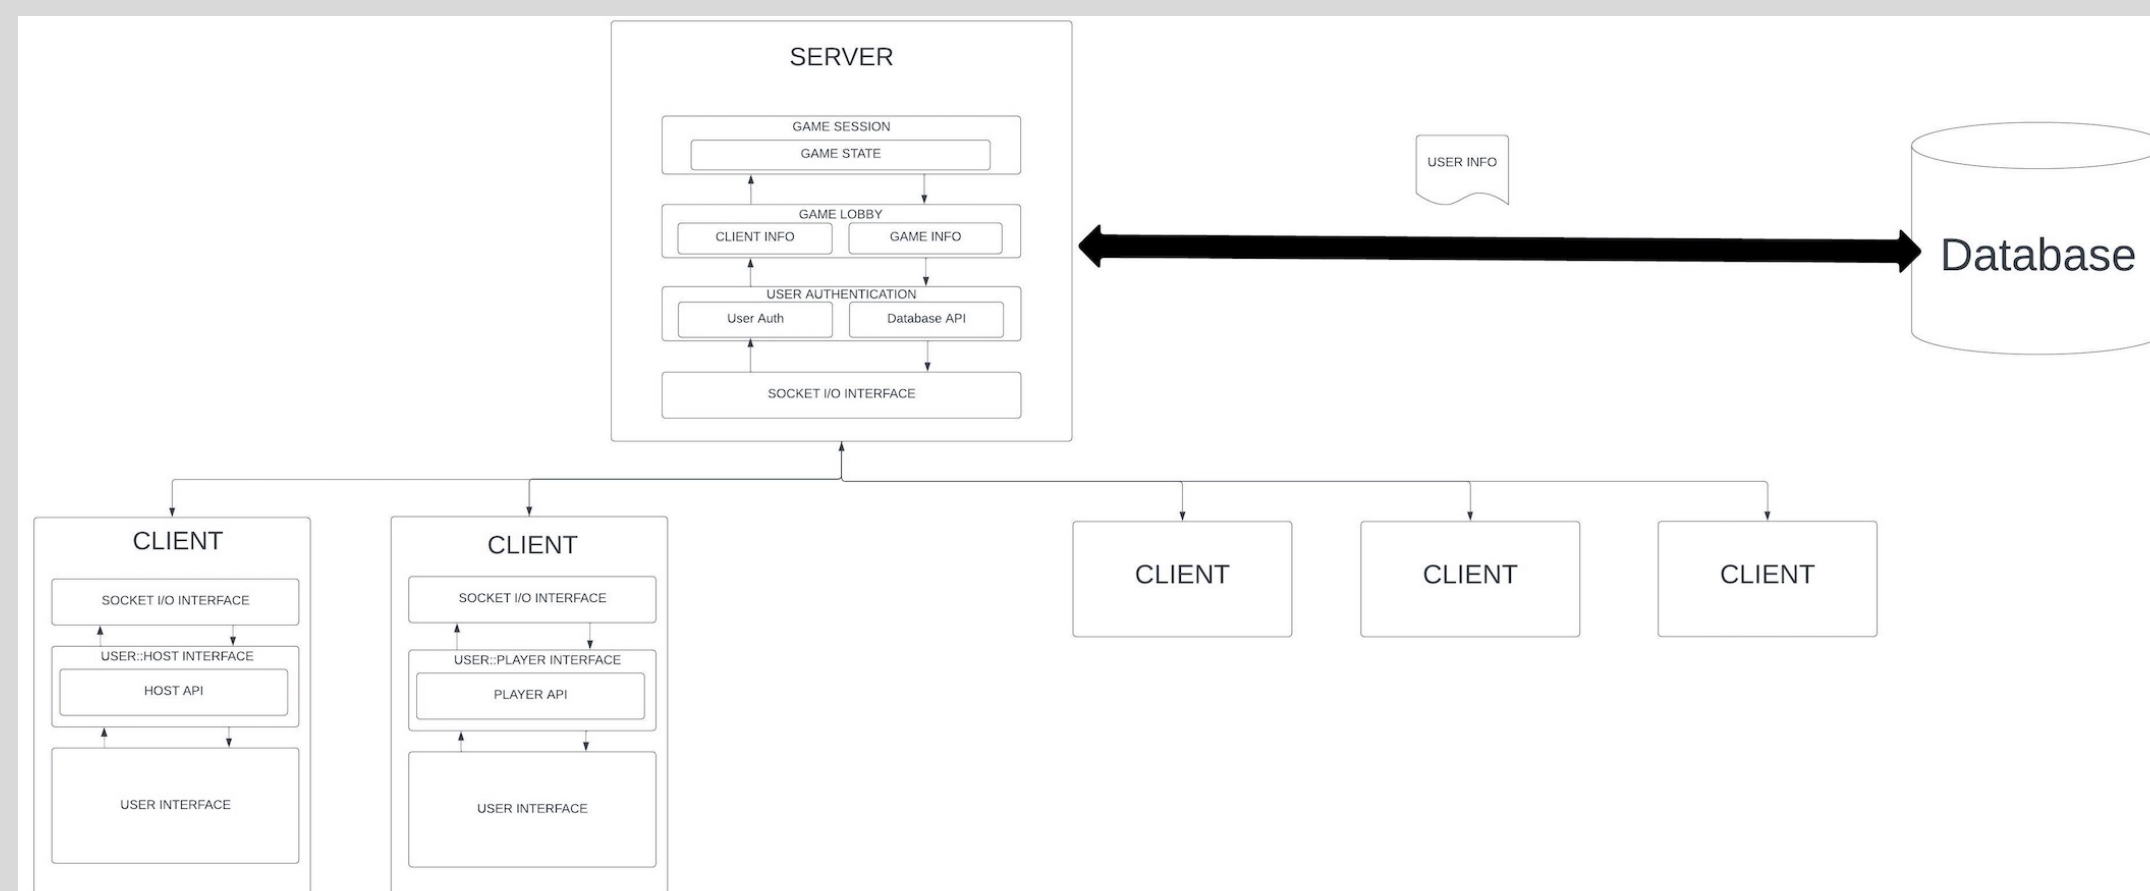

# JAM: Quiz application

## Process

## Architecture

## Features

1. Quiz creation
2. Session Hosting
3. Real-time participation
4. Leader boards
5. User accounts
6. Interactive elements
7. Accessibility

## Users

1. Students
2. Teachers
3. Trainers

## Platforms

Desktop and mobile
